

CIEC™ INFO

Accredited by the Council of Engineering and Scientific Specialty Boards

CIEC™

The American IAQ Council offers the Council-Certified Indoor Environmental Consultant™ (CIEC), which is accredited as an engineering-related program by the CESB, to individuals whose training and field experience in industrial hygiene, building sciences and environmental risk assessment warrants professional recognition. The certification documents their skills and knowledge base regarding design, construction and operation of buildings in relation to the quality and efficiency of the indoor environment in a manner that could be relied upon by individuals and organizations seeking their services as employees, consultants or advisors for the assessment and management of new or established indoor environments.

Objectives of the CIEC™ Program:

1. To raise the standards of those engaged in indoor air quality testing, sampling, monitoring and consulting.
2. To identify persons with acceptable knowledge of indoor air quality and the standards and regulations affecting Council-certified Indoor Environmental Consultants™.
3. To award special recognition to those Indoor Environmental Consultants who have demonstrated verifiable field experience

WE'RE IN GOOD COMPANY

AACE International

Academy of Board Certified Environmental Professionals

American Academy of Environmental Engineers

American Board of Health Physics

American Board of Industrial Hygiene
